- ENWALL is a non-chemical, electrostatic Plug and Play, AC ready, rechargeable Supercapacitor Energy Storage System.
- It is designed to store excess energy generated by solar panels, and then provide that energy to power your home/business at night or during grid outages, and during and after a typhoon.
- ENWALL is compact and can be easily installed either as a standalone system or integrated with a solar energy system.
- With its advanced technology and features, ENWALL provides homeowners & businesses with a more reliable and cost-effective source of energy while also helping to reduce reliance on the grid
- Single-Phase Units: 5kWh / 10kWh / 20kWh
- Three-Phase Units: 10kWh / 20kWh
